## Introduction to Cloud Development with HTML, CSS, and JavaScript Module 2 Glossary: HTML5 and CSS Overview

| Term             | Definition  |
|------------------|---|
| DOM Tree         | "Document Object Model" is the data representation of<br>the objects that comprise the structure and content of<br>a document on the web.                                     |
| XML              | An "eXtensible Markup Language" Designed to store and<br>transport data allowing users to define their own<br>markup languages, primarily to display documents on the<br>web. |
| XHTML            | An "eXtensible Hypertext Markup Language" Similar to<br>HTML but with stricter formatting rules.  |
| Web Storage APIs | APIs that allow data storage in a browser.  |
